INDEX TO SUBJECTS

A

Adenosine monophosphate, cyclic, effect on nucleoside transport in murine mastocytoma P815Y, biochemical study, 359

— monophosphate, dibutyryl cyclic, and Sephadex fractions of chick embryo extract, effects on cloned retinal pigmented epithelium, cytological and light EM study, 369

Alga *Anabaena cylindrica*, heterocysts, fixation of nitrogen gas, autoradiographic and physical study, 440

— *Ochromonas danica*, microtubule biogenesis and cell shape, effects of isopropyl *N*-phenylcarbamate, biochemical and light and EM study, 514

Anesthetic, dibucaine, nonlethal deciliation of *Tetrahymena*, biochemical and EM study, 253

Antibody, hemocyanin-labeled, distribution of cell surface antigens in avian tumor virus-infected chick embryo fibroblasts, immunological and EM study, 743

Antigen, Forssman, cell mitotic cycle synthesis of NIL hamster glycolipids, biochemical and immunological study, 676

Antigens, surface, distribution in avian tumor virus-infected chick embryo fibroblasts, immunological and EM study, 743

Axon, crayfish, excitable membrane ultrastructure, freeze-fracture EM study, 107

—, squid giant synapse, association of calcium with membranes, X-ray microprobe and EM study, 156

—, squid giant synapse, calcium-containing electron-dense structures, X-ray and EM study, 146

— transport of glycoprotein, *Aplysia californica* giant neuron R2, autoradiographic and biochemical study, 665

Axostyle, flagellate *Saccinobaculus*, bridges between microtubules, EM study, 166

B

Bacteria *Streptococcus faecalis*, mesosomes, effect of fixation, biochemical and freeze-fracture EM study, 288

Bladder, urinary, pig, hexagonal luminal membranes, biochemical and EM study, 83

—, urinary, toad, vasopressin-induced changes in epithelial cells, scanning EM study, 544

Blast transformation and RNA and DNA synthesis, human lymphocytes, stimulation by zinc, biochemical study, 45

Bone tissue, in vitro formation from bone cells, biochemical and histochemical and EM study, 427

Brain, rabbit, Deiters' neurons, relationship of neurofilamentous network to plasma membrane and nuclear pores, physicochemical and EM study, 701

—, rat, separation of three distinct populations of nerve endings, biochemical and EM study, 466

Bridges between microtubules, flagellate *Saccinobaculus* and chicken testis, EM study, 166

5-Bromodeoxyuridine, effect on growth, encystment, and excystment of *Acanthamoeba castellanii*, cytological study, 233

C

Calcium, association with membranes, squid giant axon, X-ray microprobe and EM study, 156

— binding sites, synaptic vesicles, frog neuromuscular junction, EM study, 818

— and magnesium, effects on rapid axonal protein transport, frog sciatic nerve, biochemical and EM study, 812

— phosphate granules, blue crab hepatopancreas, biochemical and EM study, 316

— transport, mitochondria, blue crab hepatopancreas, biochemical and EM study, 301

—, ultrastructural localization, squid giant axon, X-ray and EM study, 146

Catalase synthesis, rat and mouse liver, stimulation by nafenopin, biochemical and light and EM study, 344

Cations, barium and strontium, mitochondrial accumulation, rabbit smooth muscle, electron probe and EM study, 723

Cell cycle, cultured fetal rat hepatocytes, alpha$_1$-fetoprotein biosynthesis, biochemical and immunological study, 823

— cycle, paramecium, changes in DNA synthesis with increased clonal age and interfission time, autoradiographic study, 591

— sections, sequential resolution light and electron microscopy of same material, re-embedding technique, 261

— shape and microtubule biogenesis, *Ochromonas danica*, effects of isopropyl *N*-phenylcarbamate, biochemical and light and EM study, 514

Cells, acinar, guinea pig pancreas, synthesis and turnover of cytoplasmic membrane proteins, biochemical study, 1

—, avian tumor virus-infected chick embryo fibroblasts, distribution of cell surface antigens, immunological and EM study, 743

—, Balb/c 3T3 fibroblasts, effect of insulin on surface membranes and polysomes, scanning and transmission EM study, 95

—, BC$_3$HI derived from mouse neoplasm, comparison

with smooth muscle, biochemical and physiological and EM study, 398
Cells, chick embryo neural retina, effect of cytosine arabinoside on glutamine synthetase, suppression of macromolecular synthesis, biochemical and immunochemical study, 688
—, chick embryo spinal ganglion, effects of lanthanum on glial cell locomotion and adhesion, nerve axon elongation, cinematographic and EM study, 56
—, chick retinal pigmented epithelium, effects of cyclic AMP and Sephadex fractions of chick embryo extract, cytological and light and EM study, 369
—, chicken and human erythrocytes, Ehrlich ascites tumor, hamster melanoma, fusion with retention of erythrocyte cytoplasm, nuclear activation in heterokaryons, light and EM study, 241
—, Chinese hamster fibroblasts, nucleus, isopycnic centrifugation of chromatin in Renografin, biochemical study, 780
—, epithelial, guinea pig small intestine, zonal rotor preparation of microperoxisomes, biochemical and EM study, 123
—, epithelial, toad urinary bladder, vasopressin-induced changes, scanning EM study, 544
—, exocrine, guinea pig pancreas, stereological model, EM study, 269
—, fetal rat hepatocytes, alpha$_1$-fetoprotein biosynthesis during growth cycle, biochemical and immunological study, 823
—, HeLa, Vero, L, HEp2, and MDBK, effect of cytochalasin D on cell surface and cytoplasm contraction, autoradiographic and biochemical and light and EM study, 481
—, human-mouse and monkey-mouse somatic hybrids, genetic control of mitochondrial thymidine kinase, biochemical study, 35
—, hybrids of normal and SV40 transformed, localization of concanavalin A receptors, EM study, 553
—, L strain, direct visualization of nucleotides in DNA, autoradiographic and EM study, 257
—, murine mastocytoma P815Y, effect of growth inhibitors on nucleoside transport, biochemical study, 359
—, NIL hamster clone 2Cl, mitotic cycle synthesis of phospholipids and glycolipids including Forssman antigen, biochemical and immunological study, 676
—, Novikoff rat ascites hepatoma, discontinuous replication of circular mitochondrial DNA, EM study, 14
—, rat bone, formation of bone tissue in culture, biochemical and histochemical and EM study, 427
—, 3T3 mouse fibroblasts, normal and transformed, ruthenium red staining, EM study, 548
—, 3T3 and SV3T3, effects of colchicine, cytochalasin B, and 2-deoxyglucose on surface bound concanavalin A, biochemical and EM study, 70
Centrifugation, isopycnic and differential, subfractionation of rat liver microsomes in linear density gradients, biochemical study, 213
Chick embryo extract, Sephadex fractions, and cyclic AMP, effects on cloned retinal pigmented epithelium, cytological and light and EM study, 369
Chicken, testis, and flagellate *Saccinobaculus*, bridges between microtubules, EM study, 166
Chromatin, Chinese hamster fibroblast nuclei, isopycnic centrifugation in Renografin, biochemical study, 780
Chromosomes, human, dye-nucleoprotein interactions in Giemsa banding, cytochemical study, 248
Cilia, *Tetrahymena*, nonlethal removal by dibucaine, biochemical and EM study, 253
Colchicine, cytochalasin B, and 2-deoxyglucose, effects on surface bound concanavalin A in 3T3 and SV3T3 fibroblasts, biochemical and EM study, 70
Concanavalin A receptor sites in somatic cell hybrids, EM study, 553
— A, surface bound in 3T3 and SV3T3 fibroblasts, effects of colchicine, cytochalasin B, and 2-deoxyglucose, biochemical and EM study, 70
Connexin, protein, mouse hepatocyte gap junctions, biochemical and EM study, 557
Contracture, HeLa, Vero, L, HEp2, and MDBK cell lines, effect of cytochalasin D, autoradiographic and biochemical and light and EM study, 481
Cornea, rabbit, effects of in vitro perfusion of cytochalasin B on endothelium, physiological and EM study, 537
Crab *Callinectes sapidus*, hepatopancreas, calcium phosphate granules, biochemical and EM study, 316
— *Callinectes sapidus*, hepatopancreas, calcium transport by mitochondria, biochemical and EM study, 301
Crayfish *Procambarus clarkii*, abdominal nerve cord, excitable membrane ultrastructure, freeze-fracture EM study, 107
Cytochalasin B, colchicine, and 2-deoxyglucose, effects on surface bound concanavalin A in 3T3 and SV3T3 fibroblasts, biochemical and EM study, 70
— B, effects of in vitro perfusion on rabbit cornea endothelium, physiological and EM study, 537
— D, effect on cell surface and cytoplasm contraction, HeLa, Vero, L, HEp2, and MDBK cell lines, autoradiographic and biochemical and light and EM study, 481
Cytochrome b_5, ultrastructural localization on rat liver, cytochemical EM study, 237
Cytoplasm, erythrocyte, retention in fusion of chicken erythrocyte-melanoma heterokaryons, light and EM study, 241
Cytosine arabinoside, effect on glutamine synthetase, suppression of macromolecular synthesis, chick embryo neural retina, biochemical and immunochemical study, 688

D

2-Deoxyglucose, colchicine, and cytochalasin B, effects on surface bound concanavalin A in 3T3 and SV3T3 fibroblasts, biochemical and EM study, 70

Deoxyribonucleic acid, circular, discontinuous replication, mitochondria of Novikoff rat ascites hepatoma, EM study, 14
— acid, L cells, direct visualization of nucleotides, autoradiographic and EM study, 257
— acid and RNA synthesis, human lymphocytes, stimulation by zinc, biochemical study, 45
— acid, *Saccharomyces cerevisiae* mitochondria, nuclear gene dosage effects, biochemical and EM study, 565
— acid synthesis, paramecium, effect of increased clonal age and interfission time, autoradiographic study, 591
—acid, *Tetrahymena pyriformis* mitochondria, effect of ethidium bromide on replicative intermediates, biochemical and EM study, 383
Dibucaine, nonlethal deciliation of *Tetrahymena*, biochemical and EM study, 253
Disaccharides, sucrose, lactose, maltose, and cellobiose, splitting of mouse hepatocyte gap junctions and zonulae occludentes with hypertonic solutions, freeze-fracture EM study, 575
Dopa decarboxylase, stimulation by ecdysone, relationship to ovarian development, *Aedes aegypti*, biochemical and light microscope study, 454
Dye-nucleoprotein interactions in Giemsa banding, human blood chromosomes, cytochemical study, 248

E

Ecdysone stimulation of dopa decarboxylase, relationship to ovarian development, *Aedes aegypti*, biochemical and light microscope study, 454
Encystment, excystment, and growth of *Acanthamoeba castellanii*, effect of 5-bromodeoxyuridine, cytological study, 233
Endoplasmic reticulum, rough, mouse mammary epithelial, changes in ribosomes, microsomal proteins and secretory character during differentiation, biochemical study, 613
Endothelium, rabbit cornea, effects of in vitro perfusion of cytochalasin B, physiological and EM study, 537
Enzyme, dopa decarboxylase, stimulation by ecdysone, relationship to ovarian development, *Aedes aegypti*, biochemical and light microscope study, 454
—, glutamine synthetase, effect of cytosine arabinoside, chick embryo neural retina, biochemical and immunochemical study, 688
—, thymidine kinase, mitochondria, human-mouse and monkey-mouse somatic cell hybrids, genetic control, biochemical study, 35
Enzymes, ATPase, DPNH cytochrome *c* reductase, and succinic cytochrome *c* reductase, hexagonal membranes of pig urinary bladder, biochemical and EM study, 83
—, 25, distribution of in rat liver microsomes, biochemical and EM study, 201
—, rat liver microsomes and subcellular membranes, biochemical study, 188
—, subfractionation of rat liver microsomes in linear density gradients, biochemical study, 213
Epithelial cells, toad urinary bladder, vasopressin-induced changes, scanning EM study, 544
Epithelium, cloned retinal pigmented, effects of cyclic AMP and Sephadex fractions of chick embryo extract, cytological and light and EM study, 369
—, frog gall bladder, fluid-transporting, absence of dilated lateral intercellular spaces, Nomarski and EM study, 830
Ethidium bromide, effect on replicative intermediates of mitochondrial DNA in *Tetrahymena pyriformis*, biochemical and EM study, 383
Excystment, encystment, and growth, of *Acanthamoeba castellanii*, effect of 5-bromodeoxyuridine, cytological study, 233
Eye, frog, fatty acid renewal in membranes of visual cell outer segment, biochemical and autoradiographic study, 327

F

Fatty acid renewal, membrane of frog visual cell outer segment, biochemical and autoradiographic study, 327
Fibers, fast and slow muscle, pigeon, regeneration after excision and mincing, histochemical and EM study, 414
Fish *Fundulus heteroclitus*, *Holocentrus ascentionis*, and *Gymnocorymbus ternetzi*, melanophores, role of microtubules in movement of pigment granules, light and EM study, 757
Fixation, chemical, effect on mesosomes of *Streptococcus faecalis*, biochemical and freeze-fracture EM study, 288
Flagella, *Ochromonas danica*, effects of isopropyl *N*-phenylcarbamate, biochemical and light and EM study, 514
Frog *Rana esculenta*, gall bladder, absence of dilated lateral intercellular spaces in fluid-transporting epithelium, Nomarski and EM study, 830
— *Rana pipiens*, eye, fatty acid renewal in membranes of visual cell outer segment, biochemical and autoradiographic study, 327
— *Rana pipiens*, lateral motor column neurons, role of Golgi apparatus and GERL in genesis of lysosomes, light and EM study, 599
— *Rana pipiens*, oocytes, steroid inhibition of protein incorporation, biochemical and EM study, 26
— *Rana pipiens*, sartorius neuromuscular junction, calcium binding sites of synaptic vesicles, EM study, 818
— *Rana temporaria*, sciatic nerve, effect of calcium and magnesium on rapid axonal protein transport, biochemical and EM study, 812

G

Gall bladder, frog, absence of dilated lateral intercellular spaces in fluid-transporting epithelium, Nomarski and EM study, 830
Ganglia, squid, calcium-containing electron-dense structures, X-ray and EM study, 146

Gene activity, chick embryo neural retina, differential effects of cytosine arabinoside, biochemical and immunochemical study, 688
— dosage effects, nuclear, on mitochondrial mass and DNA, *Saccharomyces cerevisiae*, biochemical and EM study, 565
Genetic control of mitochondrial thymidine kinase in human-mouse and monkey-mouse somatic cell hybrids, biochemical study, 35
GERL and Golgi apparatus, role in genesis of lysosomes, frog lateral motor column neurons, light and EM study, 599
Giemsa banding, human blood chromosomes, dye-nucleoprotein interaction, cytochemical study, 248
Glial cell, chick embryo spinal ganglion, effects of lanthanum on locomotion and adhesion, nerve axon elongation, cinematographic and EM study, 56
Globules, crayfish axon, excitable membrane ultrastructure, freeze-fracture EM study, 107
—, squid axon, localization of calcium, X-ray and EM study, 146
Glutamine synthetase, effect of cytosine arabinoside, chick embryo neural retina, biochemical and immunochemical study, 688
Glycolipids, Forssman antigen, mitotic cycle synthesis, NIL hamster cells, biochemical and immunological study, 676
Glycoprotein synthesis, *Aplysia californica* giant neuron R2, autoradiographic and biochemical study, 649
— transport by axon, *Aplysia californica* giant neuron R2, autoradiographic and biochemical study, 665
Golgi apparatus and GERL, role in genesis of lysosomes, frog lateral motor column neurons, light and EM study, 599
Growth, encystment, and excystment of *Acanthamoeba castellanii*, effect of 5-bromodeoxyuridine, cytological study, 233
— inhibitors, murine embryonic and uterine tissue, and cyclic AMP, effect on nucleoside transport in murine mastocytoma P815Y, biochemical study, 359
Granules, calcium phosphate, blue crab hepatopancreas, biochemical and EM study, 316
—, pigment, teleost melanophores, role of microtubules in movement, light and EM study, 757
Guinea pig, pancreas, acinar cells, synthesis and turnover of cytoplasmic membrane proteins, biochemical study, 1
—, pancreas, stereological model of exocrine cells, EM study, 269
—, small intestine epithelial cells, zonal rotor preparation of microperoxisomes, biochemical and EM study, 123

H

Hemocyanin-labeled antibody, distribution of cell surface antigens in avian tumor virus-infected chick embryo fibroblasts, immunological and EM study, 743
Hepatopancreas, blue crab, calcium phosphate granules, biochemical and EM study, 316
—, blue crab, calcium transport by mitochondria, biochemical and EM study, 301
Heterocysts, blue-green alga, fixation of nitrogen gas, autoradiographic and physical study, 440
Heterokaryons, chicken erythrocyte-melanoma, nuclear activation, fusion with retention of erythrocyte cytoplasm, light and EM study, 241
Histamine secretion, temperature dependence, rat mast cell, biochemical study, 809
Histone F1, *Tetrahymena pyriformis*, phosphorylation in macronucleus, biochemical study, 134
Hormone, vasopressin, effects on toad urinary bladder epithelial cells, scanning EM study, 544
Human, blood chromosomes, dye-nucleoprotein interactions in Giemsa banding, cytochemical study, 248
—, lymphocytes, zinc stimulation of DNA and RNA synthesis and blast transformation, biochemical study, 45

I

Insect *Aedes aegypti*, ecdysone stimulation of dopa decarboxylase, relationship to ovarian development, biochemical and light microscope study, 454
Insulin, effect on surface membranes and polysomes of Balb/c 3T3 fibroblasts, scanning and transmission EM study, 95
Intestine, small, guinea pig, zonal rotor preparation of microperoxisomes from epithelial cells, biochemical and EM study, 123
Isopropyl *N*-phenylcarbamate, effects on cell shape and flagellum regeneration, *Ochromonas danica*, biochemical and light and EM study, 514

J

Junctions, gap, mouse liver, bulk isolation of, characterization of protein connexin, biochemical and EM study, 557
—, gap, and zonulae occludentes, mouse liver, splitting with hypertonic disaccharides, freeze-fracture EM study, 575
—, neuromuscular, frog, calcium binding sites of synaptic vesicles, EM study, 818

L

Lanthanum, effects on chick embryo glial cell locomotion and adhesion, nerve axon elongation, cinematographic and EM study, 56
Lipid characterization, hexagonal membranes of pig urinary bladder, biochemical and EM study, 83
Liver, mouse, bulk isolation of gap junctions, characterization of protein connexin, biochemical and EM study, 557
—, mouse, gap junctions and zonulae occludentes, splitting with hypertonic disaccharides, freeze-fracture EM study, 575
—, rat, microsomes, characterization of rough and

smooth subfractions, biochemical and immunochemical study, 789
Liver, rat, microsomes, distribution of 25 enzymes, biochemical and EM study, 201
—, rat, microsomes and isolated subcellular membranes, biochemical study, 188
—, rat, microsomes, subfractionation in linear density gradients, biochemical study, 213
—, rat, microsomes, ultrastructural localization of cytochrome b_5, cytochemical EM study, 237
—, rat and mouse, nafenopin-induced peroxisome proliferation and catalase synthesis, biochemical and light and EM study, 344
Locomotion, chick embryo glial cell, effects of lanthanum, cinematographic and EM study, 56
Lymphocytes, human, zinc stimulation of DNA and RNA synthesis and blast transformation, biochemical study, 45
Lysosomes, frog lateral motor column neurons, role of Golgi apparatus and GERL, light and EM study, 599

M

Macronucleus, *Tetrahymena pyriformis*, phosphorylation of histone F1, biochemical study, 134
Magnesium and calcium, effects on rapid axonal protein transport, frog sciatic nerve, biochemical and EM study, 812
Mammary gland, mouse, epithelial rough endoplasmic reticulum, changes in ribosomes, microsomal proteins and secretory character during differentiation, biochemical study, 613
Mast cells, rat, identification in scanning electron microscope by X-ray spectrometry, 641
— cells, rat, temperature dependence of histamine secretion, biochemical study, 809
Melanophores, fish, role of microtubules in movement of pigment granules, light and EM study, 757
Membranes, affinity for calcium, squid giant axon, X-ray microprobe and EM study, 156
—, cytoplasmic, guinea pig pancreatic acinar cells, protein synthesis and turnover, biochemical study, 1
—, excitable, crayfish axons, freeze-fracture EM study, 107
—, frog visual cell outer segment, fatty acid renewal, autoradiographic and biochemical study, 327
—, hexagonal, pig urinary bladder, biochemical and EM study, 83
—, plasma, and nuclear pores, rabbit brain Deiters' neurons, relationship of neurofilamentous network, physicochemical and EM study, 701
—, sarcoplasmic reticulum and transverse tubular system, tarantula spider skeletal muscle, freeze-fracture EM study, 501
—, subcellular, rat liver microsomes, biochemical study, 188
—, surface, and polysomes, Balb/c 3T3 fibroblasts, effect of insulin, scanning and transmission EM study, 95
—, *Tetrahymena pyriformis* nucleus, effect of temperature on structure, biochemical and freeze-fracture EM study, 633
Mesosomes, *Streptococcus faecalis*, effect of fixation, biochemical and freeze-fracture EM study, 288
Microbody (peroxisome), rat and mouse liver, nafenopin-induced proliferation, biochemical and light and EM study, 344
Microscopy, light and electron, sequential resolution of same material, re-embedding technique, 261
—, scanning electron, identification of rat mast cells by X-ray spectrometry, 641
Microsomes, mouse mammary epithelium, effect of gestation and lactation on distribution and protein content, biochemical study, 613
—, rat liver, characterization of rough and smooth subfractions, biochemical and immunochemical study, 789
—, rat liver, distribution of 25 enzymes, biochemical and EM study, 201
—, rat liver, subfractionation in linear density gradients, biochemical study, 213
—, rat liver, ultrastructural localization of cytochrome b_5, cytochemical EM study, 237
—, and subcellular membranes, rat liver, biochemical study, 188
Microtubule biogenesis and cell shape, *Ochromonas danica*, effects of isopropyl *N*-phenylcarbamate, biochemical and light and EM study, 514
— bridges, flagellate *Saccinobaculus* and chicken testis, EM study, 166
Microtubules, teleost melanophores, role in movement of pigment granules, light and EM study, 757
Microvilli, HeLa, Vero, L, HEp2, and MDBK cell lines, effect of cytochalasin D, autoradiographic and biochemical and light and EM study, 481
Mitochondria, blue crab hepatopancreas, calcium transport, biochemical and EM study, 301
—, human-mouse and monkey-mouse somatic cell hybrids, genetic control of thymidine kinase, biochemical study, 35
—, Novikoff rat ascites hepatoma cells, discontinuous replication of circular DNA, EM study, 14
—, rabbit smooth muscle, cation accumulation, electron probe and EM study, 723
—, *Saccharomyces cerevisiae*, nuclear gene dosage effects on mass and DNA, biochemical and EM study, 565
—, *Tetrahymena pyriformis*, effect of ethidium bromide on replicative intermediates of DNA, biochemical and EM study, 383
Mitotic cycle synthesis of glycolipids, phospholipids and Forssman antigen, NIL hamster, biochemical and immunological study, 676
Model, stereological, guinea pig pancreatic exocrine cells, EM study, 269
Mollusk *Aplysia californica*, giant neuron R2, axonal transport of glycoproteins, autoradiographic and biochemical study, 665
— *Aplysia californica*, giant neuron R2, glycoprotein synthesis, autoradiographic and biochemical study, 649
Mouse, liver, bulk isolation of gap junctions, charac-

terization of protein connexin, biochemical and EM study, 557
Mouse, liver, gap junctions and zonulae occludentes, splitting with hypertonic disaccharides, freeze-fracture EM study, 575
—, mammary gland, epithelial rough endoplasmic reticulum, changes in ribosomes, microsomal proteins and secretory character during differentiation, biochemical study, 613
—, and rat, liver nafenopin-induced microbody (peroxisome) proliferation and catalase synthesis, biochemical and light and EM study, 344
Mucopolysaccharides, normal and transformed 3T3 fibroblasts, ruthenium red staining, EM study, 548
Muscle, skeletal, pigeon, regeneration of fast and slow fiber types after excision and mincing, histochemical and EM study, 414
—, skeletal, tarantula spider, membranes of sarcoplasmic reticulum and transverse tubular system, freeze-fracture EM study, 501
—, smooth, rabbit, mitochondria, cation accumulation, electron probe and EM study 723

N

Nafenopin-induced hepatic microbody (peroxisome) proliferation and catalase synthesis, mouse and rat, biochemical and light and EM study, 344
Nerve axon, chick embryo spinal ganglion, effects of lanthanum on elongation and glial cell locomotion and adhesion, cinematographic and EM study, 56
— cord, crayfish, excitable membrane ultrastructure, freeze-fracture EM study, 107
— endings, rat brain, resolution of three distinct populations, biochemical and EM study, 466
—, sciatic, frog, effect of calcium and magnesium on rapid axonal protein transport, biochemical and EM study, 812
Neuromuscular junction, frog, calcium binding sites of synaptic vesicles, EM study, 818
Neuron, Deiters, rabbit brain, relationship of neurofilamentous network to plasma membrane and nuclear pores, physicochemical and EM study, 701
—, giant R2, *Aplysia californica*, axonal transport of glycoproteins, autoradiographic and biochemical study, 665
—, giant R2, *Aplysia californica*, glycoprotein synthesis, autoradiographic and biochemical study, 649
—, lateral motor column, frog, role of Golgi apparatus and GERL in genesis of lysosomes, light and EM study, 599
Nitrogen gas, fixation by heterocyst-forming blue-green alga, autoradiographic and physical study, 440
Nuclear activation in chicken erythrocyte-melanoma heterokaryons, fusion with retention of erythrocyte cytoplasm, light and EM study, 241
— gene dosage effects on mitochondrial mass and DNA, *Saccharomyces cerevisiae*, biochemical and EM study, 565
Nucleoprotein-dye interactions in Giemsa banding, human blood chromosomes, cytochemical study, 248
Nucleoside transport, murine mastocytoma P815Y, effect of growth inhibitors, biochemical study, 359
Nucleotides, direct visualization in DNA, L cells, autoradiographic and EM study, 257
Nucleus, macro-, *Tetrahymena pyriformis*, phosphorylation of histone F1, biochemical study, 134
—, Chinese hamster fibroblasts, isopycnic centrifugation of chromatin in Renografin, biochemical study, 780
—, *Tetrahymena pyriformis*, effect of temperature on membrane structure, nucleocytoplasmic RNA transport, biochemical and freeze-fracture EM study, 633

O

Oocytes, frog, steroid inhibition of protein incorporation, biochemical and EM study, 26
Ovary, *Aedes aegypti*, relationship to ecdysone stimulation of dopa decarboxylase, biochemical and light microscope study, 454

P

Pancreas, guinea pig, acinar cells, synthesis and turnover of cytoplasmic membrane proteins, biochemical study, 1
—, guinea pig, stereological model of exocrine cells, EM study, 269
Peroxisomes, micro-, guinea pig small intestine epithelial cells, zonal rotor preparation, biochemical and EM study, 123
—, rat and mouse liver, nafenopin-induced proliferation, biochemical and light and EM study, 344
Phospholipids and glycolipids, mitotic cycle synthesis, NIL hamster cells, biochemical and immunological study, 676
Phosphorylation, histone F1, *Tetrahymena pyriformis*, macronucleus, biochemical study, 134
Pig, urinary bladder, hexagonal luminal membranes, biochemical and EM study, 83
Pigeon *Columba livia*, skeletal muscle, regeneration of fast and slow fiber types after excision and mincing, histochemical and EM study, 414
Pigment granules, teleost melanophores, role of microtubules in movement, light and EM study, 757
Polysomes and surface membranes, Balb/c 3T3 fibroblasts, effect of insulin, scanning and transmission EM study, 95
Pores, nuclear, and plasma membrane, rabbit brain Deiters' neurons, relationship of neurofilamentous network, physicochemical and EM study, 701
Protein, alpha$_1$-feto-, biosynthesis during growth cycle of cultured fetal rat hepatocytes, biochemical and immunological study, 823
— characterization, hexagonal membranes of pig urinary bladder, biochemical and EM study, 83
—, connexin, mouse hepatocyte gap junctions, biochemical and EM study, 557
—, frog sciatic nerve, effects of calcium and mag-

nesium on rapid axonal transport, biochemical and EM study, 812
Protein incorporation, amphibian oocytes, inhibition by steroids, biochemical and EM study, 26
—, milk, incorporation of specific messenger RNA into mouse mammary epithelial rough endoplasmic reticulum formed after parturition, biochemical study, 613
— synthesis and turnover, cytoplasmic membranes in guinea pig pancreatic acinar cells, biochemical study, 1
Protozoan *Acanthamoeba castellanii*, effect of 5-bromodeoxyuridine on growth, encystment, and excystment, cytological study, 233
— *Paramecium aurelia*, changes in DNA synthesis with increased clonal age and interfission time, autoradiographic study, 591
— *Saccinobaculus ambloaxostylus* and *S. lata*, and chicken testis, bridges between microtubules, EM study, 166
— *Tetrahymena pyriformis*, macronucleus, phosphorylation of histone F1, biochemical study, 134
— *Tetrahymena pyriformis*, mitochondria, effect of ethidium bromide on replicative intermediates of DNA, biochemical and EM study, 383
— *Tetrahymena pyriformis*, nonlethal deciliation by dibucaine, biochemical and EM study, 253
— *Tetrahymena pyriformis*, nucleus, effect of temperature on membrane structure, nucleocytoplasmic RNA transport, biochemical and freeze-fracture EM study, 633

R

Rabbit, brain, Deiters' neurons, relationship of neurofilamentous network to plasma membrane and nuclear pores, physicochemical and EM study, 701
—, cornea, effects of in vitro perfusion of cytochalasin B on endothelium, physiological and EM study, 537
—, smooth muscle, mitochondria, cation accumulation, electron probe and EM study, 723
Rat, brain, separation of three distinct populations of nerve endings, biochemical and EM study, 466
—, liver, microsomes, characterization of rough and smooth subfractions, biochemical and immunochemical study, 789
—, liver, microsomes, distribution of 25 enzymes, biochemical and EM study, 201
—, liver, microsomes and isolated subcellular membranes, biochemical study, 188
—, liver, microsomes, subfractionation in linear density gradients, biochemical study, 213
—, liver, microsomes, ultrastructural localization of cytochrome b_5, cytochemical EM study, 237
—, mast cells, identification in scanning electron microscope by X-ray spectrometry, 641
—, mast cell, temperature dependence of histamine secretion, biochemical study, 809
—, and mouse, liver, nafenopin-induced microbody (peroxisome) proliferation and catalase synthesis, biochemical and light and EM study, 344
Radioactive label, [^{14}C]amino acids, microtubule biogenesis and cell shape, *Ochromonas danica*, effects of isopropyl *N*-phenylcarbamate, biochemical and light and EM study, 514
— label, [^{14}C]amino acids, [^{3}H]thymidine, and [^{3}H]-uridine, effect of cytosine arabinoside on glutamine synthetase, suppression of macromolecular synthesis, chick embryo neural retina, biochemical and immunochemical study, 688
— label, [^{14}C]choline, [^{14}C]- or [^{3}H]thymidine, [^{14}C]- or [^{3}H]lysine, [^{3}H]fucose, [^{3}H]leucine, and [^{3}H]-phenylalanine, isopycnic centrifugation of chromatin in Renografin, biochemical study, 780
— label, [^{14}C]dihydroxyphenylalanine, ecdysone stimulation of dopa decarboxylase, relationship to ovarian development, *Aedes aegypti*, biochemical and light microscope study, 454
— label, [^{14}C]galactose, [^{14}C]glucosamine, [^{14}C]palmitate, and [^{3}H]thymidine, cell mitotic cycle synthesis of NIL hamster glycolipids including Forssman antigen, biochemical and immunological study, 676
— label, [^{14}C]glutamic acid, [^{14}C]norepinephrine, γ-amino [^{3}H]butyric acid, [^{3}H]dihydroxyphenylethylamine, and [^{3}H]hydroxytryptamine, resolution of three distinct nerve endings from rat brain, biochemical and EM study, 466
— label, [^{14}C]glycerol, effect of fixation on mesosomes of *Streptococcus faecalis*, biochemical and freeze-fracture EM study, 288
— label, [^{14}C]hydroxyproline, [^{14}C]proline, and [^{3}H]-leucine, characterization of muscle cell line BC_3H1, biochemical and physiological and EM study, 398
— label, [^{14}C]- and [^{3}H]leucine and [^{3}H]glucosamine, characterization of rough and smooth subfraction of rat liver microsomes, biochemical and immunochemical study, 789
— label, [^{14}C]- or [^{3}H]leucine, synthesis and turnover of cytoplasmic membrane proteins in guinea pig pancreatic acinar cells, biochemical study, 1
— label, [^{14}C]palmitate and [^{3}H]leucine, nonlethal deciliation of *Tetrahymena* by dibucaine, biochemical and EM study, 253
— label, [^{14}C]uridine diphosphogalactose, rat liver microsomes and isolated subcellular membranes, biochemical study, 188
— label, [^{14}C]uridine, effect of temperature on nuclear membrane structure and nucleocytoplasmic RNA transport, *Tetrahymena pyriformis*, biochemical and freeze fracture EM study, 633
— label, [^{14}C]valine, [^{3}H]fucose, and [^{3}H]galactosamine, glycoprotein synthesis in giant neuron R2 of *Aplysia californica*, autoradiographic and biochemical study, 649
— label, [^{45}Ca] calcium chloride, tissue culture of bone cells, biochemical and histochemical and EM study, 427
— label, [^{3}H]adenosine, [^{3}H]choline, [^{3}H]thymidine, and [^{3}H]uridine, effect of growth inhibitors on nucleoside transport, murine mastocytoma P815Y, biochemical study, 359
— label, [^{3}H]arachidonic acid, [^{3}H]palmitic acid, and [^{3}H]stearic acid, fatty acid renewal in membrane of

frog visual cell outer segment, biochemical and autoradiographic study, 327
Radioactive label, [^{3}H]deoxyadenosine, [^{3}H]deoxycytidine, [^{3}H]deoxyguanosine, and [^{3}H]thymidine, direct visualization of nucleotides in DNA, L cells, autoradiographic and EM study, 257
— label, [^{3}H]fucose, axonal transport of glycoprotein, *Aplysia californica* giant neuron R2, autoradiographic and biochemical study, 665
— label, [^{3}H]leucine, changes in ribosomes, microsomal proteins and secretory character of mouse mammary epithelial rough endoplasmic reticulum during differentiation, biochemical study, 613
— label, [^{3}H]leucine, effect of calcium and magnesium on rapid axonal protein transport in frog sciatic nerve, biochemical and EM study, 812
— label, [^{3}H]leucine, steroid inhibition of protein incorporation by amphibian oocytes, biochemical and EM study, 26
— label, [^{3}H]leucine and [^{3}H]thymidine, alpha$_1$-fetoprotein biosynthesis during growth cycle of cultured fetal rat hepatocytes, biochemical and immunological study, 823
— label, [^{3}H]thymidine changes in DNA synthesis by paramecium with increased clonal age and interfission time, autoradiographic study, 591
— label, [^{3}H]thymidine, effects of cytochalasin D on HeLa, Vero, L, HEp2, and MDBK cell lines, autoradiographic and biochemical and light and EM study, 481
— label, [^{3}H]thymidine, genetic control of mitochondrial thymidine kinase in human-mouse and monkey-mouse somatic cell hybrids, biochemical study, 35
— label, [^{3}H]thymidine and [^{32}P]orthophosphate, effect of ethidium bromide on replicative intermediates of mitochondrial DNA in *Tetrahymena pyriformis*, biochemical and EM study, 383
— label, [^{125}I]concanavalin A, effects of colchicine, cytochalasin B, and 2 deoxyglucose on surface bound concanavalin A in 3T3 and SV3T3 fibroblasts, biochemical and EM study, 70
— label, [*methyl*-^{3}H]thymidine and [^{3}H]uridine, zinc stimulation of DNA and RNA synthesis and blast transformation of human lymphocytes, biochemical study, 45
— label, [^{13}N]nitrogen, fixation of nitrogen gas by heterocysts-forming blue-green alga, autoradiographic and physical study, 440
Renografin, isopycnic centrifugation of chromatin, Chinese hamster fibroblast nuclei, biochemical study, 780
Ribonucleic acid and DNA synthesis, human lymphocytes, stimulation by zinc, biochemical study, 45
— acid, messenger, specific for milk proteins, incorporation into mouse spithelial rough endoplasmic reticulum formed after parturition, biochemical study, 613
— acid, *Tetrahymena pyriformis*, effect of temperature on nucleocytoplasmic transport, biochemical and freeze-fracture EM study, 633
Ruthenium red staining of normal and transformed 3T3 fibroblasts, EM study, 548

S

Sarcoplasmic reticulum and transverse tubular system membranes, tarantula spider skeletal muscle, freeze-fracture EM study, 501
Spaces, dilated lateral intercellular, absence in fluid-transporting frog gall bladder epithelium, Nomarski and EM study, 830
Spider, tarantula *Eurpelma californicum*, skeletal muscle, membranes of sarcoplasmic reticulum and transverse tubular system, freeze-fracture EM study, 501
Squid *Loligo pealii*, giant axon, association of calcium with membranes, X-ray microprobe and EM study, 156
— *Loligo pealii*, giant axon, calcium-containing electron-dense structure, X-ray and EM study, 146
Steroid inhibition of protein incorporation, amphibian oocytes, biochemical and EM study, 26
Sulfur X-ray emission, rat mast cells, differentiation in scanning electron microscope, 641
Surface antigens, distribution in avian tumor virus-infected chick embryo fibroblasts, immunological and EM study, 743

T

Technique, identification of rat mast cells in scanning electron microscope by X-ray spectrometry, 641
—, sequential resolution light and electron microscopy of same material, 261
Temperature dependence of rat mast cell histamine secretion, biochemical study, 809
—, effect on nuclear membrane structure and nucleocytoplasmic RNA transport, *Tetrahymena pyriformis*, biochemical and freeze-fracture EM study, 633
Testis, chicken, bridges between microtubules, EM study, 166
Thymidine kinase, mitochondria, human-mouse and monkey-mouse somatic cell hybrids, genetic control, biochemical study, 35
Tissue culture, characterization of muscle cell line BC$_3$HI, biochemical and physiological and EM study, 398
— culture, cloned retinal pigmented epithelium, effects of cyclic AMP and Sephadex fractions of chick embryo extract, cytological and light and EM study, 369
— culture, fetal rat hepatocytes, alpha$_1$-fetoprotein biosynthesis during growth cycle, biochemical and immunological study, 823
— culture, isolated bone cells, biochemical and histochemical and EM study, 427
— sections, sequential resolution light and electron microscopy of same material, re-embedding technique, 261
Toad *Bufo marinus*, urinary bladder, vasopressin-induced changes in epithelial cells, scanning EM study, 544

Transverse tubular system and sarcoplasmic reticulum membranes, tarantula spider skeletal muscle, freeze-fracture EM study, 501

V

Vasopressin, effects on toad urinary bladder epithelial cells, scanning EM study, 544
Vesicles, synaptic, frog neuromuscular junction, calcium binding sites, EM study, 818
Vitellogenin incorporation, frog oocytes, inhibition by steroids, biochemical and EM study, 26

X

X-ray spectrometry, rat mast cells, identification in scanning electron microscope, 641

Y

Yeast *Saccharomyces cerevisiae*, mitochondria, nuclear gene dosage effects on mass and DNA, biochemical and EM study, 565

Z

Zeiosis, HeLa, Vero, L, HEp2, and MDBK cell lines, effect of cytochalasin D, autoradiographic and biochemical and light and EM study, 481
Zinc stimulation of DNA and RNA synthesis and blast transformation of human lymphocytes, biochemical study, 45
Zonulae occludentes and gap junctions, mouse liver, splitting with hypertonic disaccharides, freeze-fracture EM study, 575
